

ENVIRONMENT SUSTAINABILITY

" An efficient economy from the point of view of resources"

The EU environmental rules protect our natural capital common: to be successful, the economies will have to be used in the most efficient manner possible and carefully the natural resources, such as energy, water and raw materials. Environmental sustainability is about making responsible decisions that will reduce the business' negative impact on the environment.

Aware that environmental protection is one of the basic conditions for the improvement of people's lives today and tomorrow, FURLOTTI&C for years has been committed to **reducing its environmental impact** through a program programs and good practices that reduce the use of natural resources, optimize energy efficient products and technologies and foster innovations and creative solutions that add value for our clients, communities and our planet.

To manage our environmental aspects, impacts and risks FURLOTTI&C have committed to:

- **communicate our Environmental Policy** and strategy to staff and other stakeholders to raise awareness amongst these groups of their own environmental responsibilities and requirement to commit to environmental improvements (**AWARENESS**);
- **comply fully and where possible exceed** standards set in relevant local, EU and international regulatory requirements and agreements (**MANDATORY RULES**);
- **reduce where possible our carbon footprint** through prudent use of fossil fuels through energy conservation, management and efficiency within buildings and manufacturing process (**ENERGY**);
- **manage and reduce water consumption (WATER)** ;
- **reduce waste** created and where possible **reuse and recycle** before responsible disposal of surplus materials; use recycled and recyclable materials wherever possible. Ensure that wastes are managed as a resource (**WASTE**) ;
- **prevent pollution** by managing and reducing emissions to air (including greenhouse gases) and discharges to water (**EMISSIONS**) ;
- **avoid or limit** wherever practical the use of **environmentally-damaging substances**, materials and processes (**DANGEROUS SUBSTANCES**) ;
- integrate principles of environmental sustainability within all internal practices, specifically to those relating to procurement of goods and services (**SUPPLIERS**);
- **maintain biodiversity**, refurbish and develop the building in a manner that avoids negative environmental impacts and enhances the local environment (**BIODIVERSITY**) ;
- publishing an annual **Environmental Report** which summarizes our environmental performance (**COMMUNICATION**);

Building on an **Environmental Management System (UNI EN ISO 14001)** and joint the **EMAS Regulation**, FURLOTTI&C aims 'to do more with less'. Progress on implementing all areas of the policy and the policy itself will be reviewed annually by the internal Environmental Team.

Buy more sustainably - look for products that have been made with respect for the environment.
